

METALCOAT – Epoxy Coating (3 in 1 Coating) – Sample Picture

METALCOAT – Epoxy Coating (3 in 1 Coating)

Paint Application (Easy and Simple)

With MetalCoat only one application is required for the desired thickness of up to 200 micron per coat. This one coat has all the required Primer + High Build+ Finishing Color of choice – (3 in 1)

Why use METALCOAT-Epoxy Coating (3 in 1 Coating)?

Paint Cost is very much lower, comparing, having to purchase 3 coat system of Primer/Intermediate/Finishing.

Application Cost reduced with one coat application.

Higher Productivity with increased area coverage.

Equipment/Material and Labor savings by using lesser time frame/schedule to perform Single Coating.

Paint Wastages is drastically reduced. No paint is left to waste. Every drop is used up.

Save the Environment – Lesser empty paint containers to be disposed.

Economical - Pays only for 1 Coat System Comparing to Cost of 3 Coats System.
